KID'S ROOM

KAST STORAGE UNIT

Storage for a kid's room need not be fancy. Take Maarten Van Severen's *Kast* storage unit for Vitra for example. The simple proportions of the sideboard-and-crate modules and well-combined shades of pastel and pop subtly invoke both play and calm. Available at Schiavello. vitra.com schiavello.com

PARTY POUF

Casamania's *Party* poufs animate any space with their short wooden stumps and rotund seats that are tufted in the middle with an oversized button. The smaller poufs make for fun seating around the play table while the larger pouf is perfect for snuggling with friends over a book. Available at Lifestorey. casamania.it lifestorey.com

UFO MOBILE

In his lifetime, Danish designer Bent Knudsen designed more than 4,000 mobiles and moving paper cuts for his company Anni & Bent Knudsen. Production stopped after his death in the nineties but was re-introduced by Livingly in 2008. One of his earliest designs, the *UFO* mobile was displayed at the New York World Expo in 1964. Available online at Livingly. livingly.dk

DOWNTOWN BOOKCASE

Magis' *Downtown* bookcase is an early start to tall ambitions. Taking the shape of a skyscraper, it is designed by Oiva Toikka – he also designed the popular, multi-coloured Magis *Paradise Tree* coat stand – and is made from rotational-moulded polyethylene, which means it can be used outdoors as well. Available at Xtra. magisdesign.com xtra.com.sg

LEANDER JUNIOR BED

The *Leander* junior bed makes transiting from the cot to the bed fun for the kids and assuring for the parents. It has a welcoming, playful appeal and its low height makes it safe for young kids to get in and

out of bed. For added peace of mind, one can also opt for a side safety guard. Available at Baby's Hyperstore. leander.com bidhyper@singnet.com.sg
